

# JOHN FELIX M. AGDA

2024

## Software developer // Designer

A solution-oriented developer with a laser sharp focus on design, performance, and usability. Experienced in DevOps, designing optimized software and cloud-based automations as well as immersive, interactive user experiences. Suited to collaboration with large teams and can adapt to a multitude of situations, solving problems with innovation and unrivaled efficiency that never fails to provide successful results.

## Work Experience

### Accenture Philippines

2023 - 2024

Student Intern, DevOps, Developer

Provided application support specializing in server management, visualized quantitative data for business intelligence, and created automations that focused on creating a more efficient workload for the team.

## Extracurriculars

### RevSentinel Web Extension

2022 - 2023

Lead Developer

A project created for our undergraduate thesis. Acted as the primary developer of the image processing algorithm used in the software and helped in creating, testing, and documenting the natural language processing algorithm. Developed using JavaScript and Python.

### FEU Tech Communications Office

2023

Graphic Designer

Created graphics and publication materials used in disseminating information as part of the university's Communication Office.

### Association for Computing Machinery FEU Tech Student Chapter

2022 - 2023

Creative Director

Responsible for creating and maintaining the brand for the current academic year, ensuring that events, publication materials, and products successfully reflect the identity of the student chapter and ACM International.
